

mTBI REHABILITATION COURSE

09:00-17:00 27TH MARCH, 2026

ABOUT THE PROGRAMME

This one day course enhances understanding of mild traumatic brain injury (mTBI) and optimising recovery post-diagnosis through comprehensive assessment and treatment strategies.

- Understand acute concussion pathophysiology
- Recognise different clinical profiles and symptom presentations post diagnosis
- Participate in practical workshops on oculomotor, vestibular, cervical, and autonomic systems
- Learn practical treatment skills
- Recognise the role of the wider multidisciplinary team and when to refer
